Full Stack Developer

The Maine Community College System is seeking applications for the position of Full Stack Developer. This position is a highly skilled computer programmer who is capable of designing and developing both front and back-end programming. Full Stack Developers will be required to work through a project from conception to final product, requiring good organizational skills and attention to detail. The individual is responsible for developing and designing front end web architecture, managing back-end server and system design and configuration, ensuring the responsiveness of web applications, and working alongside graphic designers, content creators, and data analysts to build functional web applications. Prior to development, the Full Stack Developer will analyze the business and data needs to ensure that the web applications meet the organizational needs. Finally, the Full Stack Developer will implement assigned User Interfaces, utilizing APIs, connecting the two, and creating and verifying all the data extracts needed.

A Bachelor’s degree in Computer Science, Programming, Software Design or related field and two years of experience in application development, SQL programming, and system administration OR an AA/AS in Computer Science, Programming, Software Design or related field and four years of experience in application development, SQL programming, and system administration is required. An equivalent combination of experience, education, and training will be considered.

To apply, please submit a cover letter, resume, and three references by the close of business on June 4, 2021 to:
